Company Wechat

FEATURES

- The Corail stem with same design, has more than 25 years clinical history, with a total of 1 million implantations worldwide.
- Precision forged Ti6Al4V material can improve biocompatibility, fatigue strength and reduce elastic modulus.
- The double taper design increases the vertical stability and rotation stability of the prosthesis, and optimizes the proximal filling of the medullary cavity.

Trapezoidal-like proximal cross section. To provide rotational stability and self locking.

CASE

SPECIFICATION

Standard prosthesis

Name	Size	Stem Length L	Neck Length LN	Offset H	Proximal Size W	Distal Size W1	Neck Angle a	Mat.	Taper	Coating	Pic
BE Stem component	8	115	40.5	38.4	24.5	6	135	Ti6Al4V	12/14	Ti+ HA	
	9			38.9	25.5	6					
	10			39.8	26.5	6					
	11			40.7	27.5	7					
	12			41.3	28.5	8					
	13			42.2	29.5	9					
	14			43.1	30.5	10					
	15			44	31.5	11					
	16			44.8	33	12					

High eccentricity prosthesis
